

The Amerisure Advantage at Work

An increasing number of independent insurance agencies and businesses are learning that when you partner with Amerisure, good things can happen. By delivering the highest quality insurance products, with an unparalleled level of service focused on reducing hazards and the resulting claims, Amerisure protects businesses as well as the health and safety of every worker. Through this commitment we provide exceptional value, or, as the following real-world case study demonstrates, the Amerisure Advantage.

Case in Point

A Florida-based construction company posted a 509% loss ratio for a policy year. The good news? A service-focused Loss Control Consultant from Amerisure was put on the case. The first order of business was to address the need for a full-time safety director. Rather than simply making this recommendation to the policyholder, the Loss Control Consultant went the extra mile to assist the contractor in interviewing and hiring a highly qualified candidate. Once brought on board, Amerisure Loss Control mentored the new safety director and awarded him a grant to attend the Georgia Institute of Technology for a course in OTI Trenching & Excavation Training.

Keeping with our commitment, Amerisure partnered with the new safety director in the field. This allowed us to provide essential information and support on the aspects of risk management relating to commercial auto and general liability exposures, as well as conducting OSHA 10-Hour Construction Training for his supervisors.

It wasn't long before things began to turn around. The loss control activities spearheaded by Amerisure played a major role in helping the contractor achieve an amazing loss ratio of only 2% within three short years—a 507% decrease. Now that's what the Amerisure Advantage can deliver!
