MANAGING CARE WITH AN INTEGRATED AND STREAMLINED APPROACH

Managed Care Services are an integral part of Amerisure's efforts in controlling costs related to Workers' Compensation claims. We provide added value to policyholders by streamlining the prescription process and identifying cost savings without sacrificing quality care. Through our partnership with Optum, a leading Workers' Compensation pharmacy benefit manager, we provide injured workers with a prescription card accepted at more than 70,000 pharmacies nationwide, providing easy accessibility from the onset of the claim.

HOW THIS INTEGRATED APPROACH BENEFITS THE POLICYHOLDER AND THE INJURED EMPLOYEE

- Eliminates out-of-pocket expenses for injured employees on compensable medications
- Reduces wait time for prescriptions by making coverage information immediately available to pharmacies
- Minimizes delays in receiving approvals or verifying prescriptions
- Enhances clinical oversight through automated detection of harmful drug interactions
- Detects and restricts prescriptions potentially unrelated to the claim from being dispensed without authorization
- Prevents early refills and/or prescriptions from unauthorized physicians
- Requires adjuster preapproval of narcotics and other selected drugs
- Promotes brand to generic conversions to generate savings
- Leverages national buying power to deliver significant savings frequently below state pharmacy fee schedules

ADDITIONAL BENEFITS OFFERED THROUGH OPTUM

Monitor Rx™

Ensures prescription adherence through scientifically valid drug screenings. Under the supervision of advanced-degree toxicology pharmacists, Optum utilizes state-of-the-art drug screening technology to monitor, detect and prevent drug abuse within our customer's pharmacy program.

CPR Rx™

Identifies potentially inappropriate medication profiles. With CPR Rx, Optum's clinical consultants review a claimant's long-term medication therapy and engage in shared discussions with the prescribing physicians in order to positively impact compliance and yield savings for our customers.
